EXPERIMENT

Title

TRIO

Description

Problem Statement:

Imagine you have three magical crystals, each with a number on it: X, Y, and Z.

You're on a magical adventure where you pick two crystals from a table. Your goal is to find the highest sum you can get by choosing two of these magical crystals, using their numbers to create the most powerful combination.

Input Format:

The first line of input contains three space-separated integers X,Y and Z.

Output Format:

Print the highest possible sum of the numerals inscribed on the chosen two crystals.

Constraints:

$1 \leq X, Y, Z \leq 10^8$

Sample Input:

1 2 3

Sample Output:

5

Source Code:

```
x,y,z=map(int,input().split())
a=[x,y,z]
a.sort()
print(a[1]+a[2])
```

RESULT

5 / 5 Test Cases Passed | 100 %
